

# PROJECT PAT

A Student forum website for task management

## Assigning Task

Effortlessly organize, prioritize, and track tasks with pat. Stay productive with intuitive task management, deadlines, and collaboration tools

## Managing Task

"Easily assign tasks to team members, set deadlines, and track progress with pat's seamless collaboration and delegation features."

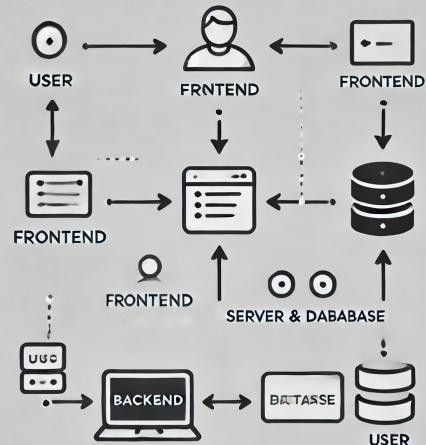

## Completing Task

"Track progress, meet deadlines, and complete tasks efficiently with pat's smart reminders, productivity insights, and streamlined workflow."

## About us

Project Pat is a task management website with a frontend and backend architecture. Users interact with the frontend to manage their tasks, while the backend, supported by a server and database, ensures data is securely stored and remains reliable.
